

David García Garzón. Curriculum Vitae

Personal Data

Full name:	David García Garzón
Born	10th May 1975, Barcelona, Spain
Nationality	Spain
E-mail	david.garcia at upf.edu

Research Interests

Music software engineering, Music information retrieval, 3D acoustics simulation, 3D audio production and playback, Emergent evolutionary systems, Free and Open Source Software, Software project management

Education

2007 - Ongoing	PhD in Information, Communication and Audiovisual Media Technologies coursed at Universitat Pompeu Fabra . <i>Proposal: Relating audio and 3D scenarios in audiovisual productions.</i>
2006 - 2007	Master in Information, Communication and Audiovisual Media Technologies coursed at Universitat Pompeu Fabra . <i>Thesis: Visual Prototyping for Audio Applications.</i> Topics: Audio Software Engineering, Frameworks, Domain Specific Languages, Prototyping tools
1997 - 2002	Engineering in Computer Science coursed at Enginyeria la Salle, Universitat Ramon Llull . <i>Final Career Project: XML support for an audio framework.</i> Topics: XML, C++ template metaprogramming, Audio processing, Frameworks design
1993 - 1997	Technical Engineering in Computer Science coursed at Enginyeria la Salle, Universitat Ramon Llull . <i>Final Career Work: Bioscena, an evolutionary environment with interaction among individuals.</i> Topics: Artificial Life, Genetic algorithms, Advanced OO Design
1988 - 1993	BUP/COU (Bachelor) in Cientific/Sanitary coursed at Col·legi Llor (Sant Boi de Llobregat) .

Awards

2006	Winner of the ACM Multimedia 2006 Open Source Software Competition with the CLAM framework.
------	---------------------------------------------------------------------------------------------

Professional Experience

Jun 2007-Now	Researcher at Barcelona Mèdia. Design and develop real-time systems for 3D audio. The system became the basis for a commercial start-up (ImmSound). It was deployed in cinemas world wide, until Dolby decided to buy the technology. My contributions include defining the processing architecture as well as the application, algorithm transcription and optimization, and junior training.
--------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Dec 2005-Now	Co-founder and partner at BMAT, Barcelona Music and Audio Technologies.
Sep 2002-Now	Professor at Universitat Pompeu Fabra. Teaching Software Engineering (Requirements gathering, UML, Design Patterns, Test Driven Development, Refactoring, Agile Methodologies, C++) and Programming III (Object oriented programming, Java).
Jan 2000-Now	Core developer at CLAM (C++ Library for Audio and Music). I've take part of the team of core developers of the CLAM framework. CLAM has become a framework of reference in multimedia and audio. It won the 2006 ACM Award to the Best Multimedia Open Source Software and was a featured project for 2007 and 2008 editions of the Google Summer of Code.
Sep 2002-Jun 2004	Professor at Fundació UPC. Course: 'Software Engineering Tools and Methodologies on Free Software Platforms' within the Free Software Master.
Sep 2000-Dec 2006	Research Assistant at Music Technology Group of the Universitat Pompeu Fabra. Providing group wide support for audio software engineering dealing with technology advising, software quality assurance, software integration, software architecture, graphic interfaces and packaging. Involved in projects such as CLAM, Agnula, Cuidado, and Simac. Specialized in Free Software and Music Information Retrieval.
Feb 2005-Apr 2005	Visitor Researcher at Electronic Engineering Department at Queen Mary University of London.
Aug 2000-Dec 2003	Senior Programmer and Analyst at Cards Engineering Spain, S.L.. Developing intranet applications for industrial engineering environments. Deploying the development environment (CVS, Mantis, Automated tests...). Involved PHP, unix shell scripting and dealing multiple UNIX flavors.
Sep 1998-Jun 1999	Teacher at FUNITEC. Organizing and teaching an Ongoing Education Course on Computer Music at Enginyeria la Salle. (42 teaching hours)
Jul 1997-Dec 1997	Junior Programmer at NexTReT. Working at client site, EDS Iberia, on the ticketing section: Legacy code maintainance involving AIX, C, DB's and ticket printer low level programming. Quality control and assurance on a developing system involving Oracle technologies.
Sep 1994-Jun 1997	Collaborator and teacher assistant at Software Technology section of the Departament d'Informàtica of Enginyeria La Salle. Preparing written materials (a Smalltalk-80 manual). Teaching departamental courses on Advanced C. Teaching laboratory sessions of Programming I course. Educational intensification on Programming II. Adapting a Genetic Algorithms tool to solve permutation problems (TSP).

Publications

Language skills

Catalan	Native speaker
English	Fluent (B2)
Spanish	Native speaker

Technical skills

Programming Languages	I have a deep knowledge on programming and scripting languages such as C++, Python, PHP, Smalltalk, Java and Bash.
Web Standards	I've been working on XHTML, HTML 4.1, CSS 2.0, DOM (JavaScript), XML, XPath, XSD, XQuery... I also have experience on building cross browser web pages.
Operating systems	I've been working with several Linux flavors, mostly with Debian, SuSe, Fedora and Ubuntu. I tend to forget anything i learnt about Windows, but i could manage to make it work when needed. I just have very slight knowledge of MacOSX but the underlying FreeBSD.

Networks	I have experience programing network applications and web services (php, python, django) and setting up basic apache servers.I have some experience on LAN administration and firewalls/routers configuration.
Databases	I am an experienced SQL programmer. I have used API's such as ADOdb, DAO and ODBC. I have experience administrating MySql databases. I have theoretical knowledge on the internal implementation of distributed database managers.
Sound	I've been involved on the development of an audio and music framework involving advanced real-time signal processing and multiplatform audio hardware programming. I've got a lot of experience analyzing existing audio software to port, to enhance or to optimize it. I have experience setting up MIDI networks. I have a deep knowledge of the Linux audio infrastructure (ALSA, Jack...) I have have experience programing plugins and hosts for different plugin platforms: Ladspa, Lv2, Vst, and AudioUnits.
3D Programming	I have experience programing the OpenGL API. I experience on programming raster, shading and texturization routines. I have some notions on modeling and animating scenes. I have experience on modeling languages such as PovRay.
2D Graphics	I have experience using Gimp (PaintShop equivalent) and Inkscape (Freehand/Illustrator equivalent). I used them for both artistic and professional purposes.

Portfolio

CLAM (C++ Library of Audio and Music)	Being one of the core developers I have been involved in most of the aspects of that awarded free software project. XML support, GUI, audio back-end's, architecture, reflection, processing algorithms, quality assurance... ¹
My technical blog and web page	Daily discussion on technical stuff I work on.My technical web page contains some tutorials and several minor projects not listed here including an SConstruct tool to support Qt4, an UML Use Case diagram generator, a continuous integration efficiency tracker... ²
Course materials	A compilation of most of the material elaborated for the courses I teach. ³
Personal GitHub page	Several projects I maintain in GitHub and public contributions to other projects hosted there. ⁴
WiKo (The wiki compiler)	It is a Python script to generate webs, scientific articles and blogs from files in wiki format. I developed this tool to ease the maintaining of my own web sites. Since them it has become a community project at sourceforge and we have successfully used it in several projects I was involved in. Some nice features are: produces multiple output (pdf/html) from a single input (wiki), supports BiBTeX and LaTeX formulae, imports blogs from blogger, generates image galleries... ⁵

¹<http://clam-project.org>

²<http://canvoki.net/coder>

³<http://canvoki.net/docencia.html>

⁴<http://github.com/vokimon>

⁵<http://wiko.sourceforge.net>

CeView	A product I developed when I was working on Cards Engineering. It is a web based collaborative application to share and annotate CAD files from several TDM-like systems. Besides developing the product, I deployed the company development infrastructure to meet agile development requirements. The system was successfully implanted on Ford Ibérica, CASA, and Metro de Madrid. ⁶
PyVitae	PyVitae is a python project to define curriculum vitae using a simple text based syntax and generating several outputs including html and pdf. Like WiKo, it follows a write-once-generate-many principle. This curriculum has been generated using it.

Barcelona, June 19, 2013
